re-thinking hygiene in
pedicure treatments

We start with the problem.

Hygiene is an important part of the nail industry and one that is commonly questioned by clients and regulated by government.

We needed to find a better solution that reduces the long cleaning process, addresses cross contamination and the spread of infectious diseases - while giving clients the best pedicure treatment.

Then we found a better way.

By introducing **MagnaCleanse Technology**, the true 'pipeless' magnetic jet combined with disposable **CleanSpa Liners**, Comfortel CleanSpa professional pedicure chairs give the most hygienic pedicure treatment on the market. The improved standard cuts down cleaning times, while improving hygiene from client to client.

MagnaCleanse Technology The True Pipeless Jet

With hygiene in mind, we have re-thought the way 'pipeless' works. Comfortel's PurePedi range uses a magnetic jet that sits inside the disposable liner and creates a whirlpool jet. It does not touch the bowl and is not connected to external pipes, meaning water does not leave the bowl, unless drained. Hygiene is improved, and cross contamination between clients is a thing of the past.

Disposable CleanSpa Liners. Think Clean

Show your clients that you care. The new standard of CleanSpa Disposable Liners revolutionises hygiene as a visible reminder of cleanliness that your clients will appreciate. Gone is the long disinfection process in-between clients, the liners are designed for single use, acting as a barrier between the tub and the water. They are easy to dispose of, and for our Eco-conscious customers: they are recyclable.
